SUPPLEMENT TO REPORT #

25X1

25X1

THIS IS UNEVALUATED INFORMATION

25X1

This report is the result of a joint collection effort by the Air Force, the Army and CIA and is disseminated in accordance with the provisions of NSCID #7.

25X1

1.

- (a) National Air and Air Defense Headquarters Building. I have never been inside this building but I have passed it many times. The building is located 50 to 80 meters from, and faces toward the junction of Alkotás Ut, Villányi Ut and Budaorsi Ut. A wide, cement driveway leads to the main entrance of the building and on one side of the building is a large parking area. Gellert Hill is located behind the building, and I have been told that there are underground rooms inside the hill which are part of the National Air and Air Defense Headquarters installation. I know that on top of Gellert Hill there are several antennas. [See on notice.]

25X1

- (b) Signal Materiel Main Supply [Overlay is on file] I know this signal installation well as I have been in it many times. It is located at Daróczi Ut 3, and is divided into two main parts; one part handles signal repair work, and the other handles signal supply. I am able to draw a sketch of the physical layout of this installation. [Collector's Note: Time limitations prevented the obtaining of this sketch.]

25X1

- (c) Military Clothing Main Supply [Overlay is on file]. This is the largest Quartermaster installation of its kind in Hungary. It has two major Quartermaster facilities: the Quartermaster Supply Store and the Quartermaster Clothing Testing Laboratory.

25X1

I can draw a detailed sketch of its physical layout [Collector's Note: Sketch and detailed information concerning this installation were obtained from source and have been reported]

ARMY review completed

- (d) Military Hygiene Research Department Building /Overlay is on file [redacted] 25X1
[redacted] I had been in this building twice, once in 1955 and once in 1956. I know it fairly well and can draw a sketch of it [redacted] Note: 25X1
Due to time limitations, source was asked only to pinpoint the location of this installation. 25X1
- (e) New Ammunition Factory /Overlay on file [redacted] I have never 25X1
been inside this factory but I have often passed it and I am able to
pinpoint its location. It has many light grey-colored buildings with a
fence around them. I know that this factory was built after 1952, and
that it was in operation in 1956. I have talked several times with one
of my neighbors who drove a three and one half ton truck for this factory.
He told me that the factory was making bombs and artillery shells.
- (f) Demolition Training Field /Overlay is on file [redacted] I am able 25X1
to indicate only the location of this installation. I have seen both
infantry and engineer troops in the vicinity of this field but I do not
know what they were doing. 25X1
- (g) Shell and Fuze Factory /Overlay is on file [redacted] This is an old
factory which was built before World War II. Its main office is in
Szekesfehervar /47 12 N - 18 25 E/. Although I have never actually been
inside the factory, I have often been in its vicinity, and I know that it
was making shotgun shells for hunting purposes. The factory is fenced and
has many brown-colored buildings of various sizes. It is near the Nagy-
teteny-Diosd Railroad Station which is along the railroad that runs be-
tween Budapest and Szekesfehervar. I have seen three and one half ton
Csepel trucks entering and leaving the factory grounds on several occasions,
but I do not know what they were carrying.
- (h) Underground Ammunition Dump /Overlay on file [redacted] This is a 25X1
large but old ammunition dump which was used during World War II. It is
primarily underground with the ammunition storage facilities being in-
side of a mountain. There are two or three old, one-story, wooden barracks
above ground, which have a fence around them. Gates in the fence are
guarded by either regular army or AVO (AVH) troops, who wear khaki-colored
uniforms. I have often seen trucks bringing ammunition from the railroad
station in Diosd /47 24 N - 18 57 E/ to the ammunition dump. The ammunition
was carried in ammunition boxes made of wood which were about a meter long
and less than a meter in width. The boxes were painted different colors.
The trucks were three and one-half ton Csepel trucks. They were painted
a khaki color, and had six wheels. Each truck had a cab in which the driver
and a guard rode. On the driver's side of the truck, on the outside of
the cab, there was a black flag with the symbol of white, crossed bones
and a skull. This type of flag signifies danger and is used on ammunition
trucks particularly. TEFU 13 was painted on the sides as well as the tail
gate of the truck. I believe this means Truck Transportation District 13,
and that the truck was from a transportation company from the Central
Governmental Transportation Pool. It is my understanding that every dis-
trict in Budapest has its own motor pool and repair shop. Factories which
do not have sufficient trucks for their needs may request additional
trucks from the motor pool for their particular district. I know that
there is a numbering system for government trucks and cars.
- (i) Firing Range /Overlay is on file [redacted] I have been to this 25X1
range and fired on it in 1949 when I was taking my basic training and again
in 1951 for familiarization. It is used by all types of military units
which are located in the Budapest area, including AVO (AVH) troops. I
am able to give a detailed description of it and draw a sketch of it.
Collector's Note: This was done by source and the information and sketch
are reported [redacted] 25X1
- (j) Lamp Gyar /Overlay in on file [redacted] This is an old ammunition 25X1
factory, but the name of the factory indicates that it is a lamp factory.
I have seen many of the people who work in the factory and noticed that they
have yellow stained hands. I do not know why. The factory had an extra
road leading to it which is made of cement. A wire fence completely en-
circles the factory installation and the fence is about 180 centimeters
high. I believe that the factory is guarded by AVO (AVH) guards. I have
never actually been inside of the factory, but I have seen it from the high-
way several times. The installation has many dark grey buildings. I do not
know whether the factory is guarded by antiaircraft installations.
